

1. Common syllabus for CAT 2 across batches/slots

- **Module-2:**
 1. **Branch & Bound:** LIFO-BB and FIFO BB methods: **Job selection problem** (Job sequencing with deadline, execution time and penalty), **0-1 knapsack problem**.
- **Module-3:**
 1. Naïve String-matching algorithm, KMP algorithm, Rabin-Karp algorithm, Suffix tree
- **Module-4:**
 1. **All pair shortest path:** Bellman Ford algorithm, Floyd-Warshall Algorithm.
 2. **Network Flows:** Flow Networks, Maximum Flows: Ford-Fulkerson, Edmond-Karp, Push Re-label algorithm.
- **Module-5:**
 1. **Line Segments:** Properties, Intersection, Sweeping lines.

The course coordinator discussed and finalized the above syllabus.

2. Common CAT 2 Question Paper pattern:

The preparation of question paper for CAT-2 with module wise question with corresponding CO's were discussed and finalized

	Q1	Q2	Q3	Q4	Q5
Module	2	3	4	4	5
CO	2	3	3	3	3
BL	3	3	2or 3	2 or 3	2 or 3

3.

Question	Syllabus
Q1	Branch & Bound: LIFO-BB and FIFO BB methods: Job selection problem (Job sequencing with deadline, execution time and penalty), 0-1 knapsack problem
Q2	Naïve String-matching algorithm, KMP algorithm, Rabin-Karp algorithm, Suffix tree
Q3	All pair shortest path: Bellman Ford algorithm, Floyd-Warshall Algorithm
Q4	Network Flows: Flow Networks, Maximum Flows: Ford-Fulkerson, Edmond-Karp, Push Re-label algorithm
Q5	Line Segments: Properties, Intersection, Sweeping lines.
