

WEB PROGRAMMING

LAB TASK – : 18

NAME:- ARYAN SINGH SIKARWAR

REG NO:- 24BCE0403

TASK:- Create a web page with a `.container` div that has a maximum width of 1200px, centered horizontally on the page, with some padding inside. Place a heading and two paragraphs inside the container to demonstrate the layout.

Welcome! This Is a Centered Container

This page is a simple example of a layout pattern you'll see everywhere on the web. The content sits inside a container that stays nicely centered on large screens while remaining flexible and comfortable to read.

As your screen gets wider, the container stops growing at 1200 pixels, which helps prevent long, hard-to-read lines of text. Add your own sections, images, or components here and build on this foundation as your project grows.
