

WEB PROGRAMMING

LAB TASK – : 23

NAME:- ARYAN SINGH SIKARWAR

REG NO:- 24BCE0403

TASK:- Create a responsive **contact form** using HTML and an **external CSS file** (linked via `<link>` tag) that includes fields for name, email, subject, message (textarea), and a submit button. Style the form with a clean design featuring a card-like container with shadow effects, input field focus states, label animations, and mobile responsiveness using media queries.

The screenshot displays a web browser window with the title "Contact Form". The address bar shows the URL "127.0.0.1:5500/html/24BCE0403(ARYAN%20SINGH).html?". The browser interface includes standard menus (File, Edit, View, History, Bookmarks, Profiles, Tab, Window, Help) and a status bar at the bottom indicating "Thu Jan 8 4:30 PM" and "21%" battery. The main content area features a white card with a light gray shadow. The card has a heading "Contact Us" and a subheading "We'd love to hear from you". Below these are four input fields: "Full Name", "Email Address", "Subject", and "Message" (a larger text area). At the bottom of the card is a blue button labeled "Send Message".
