

WEB PROGRAMMING

LAB TASK – : 38

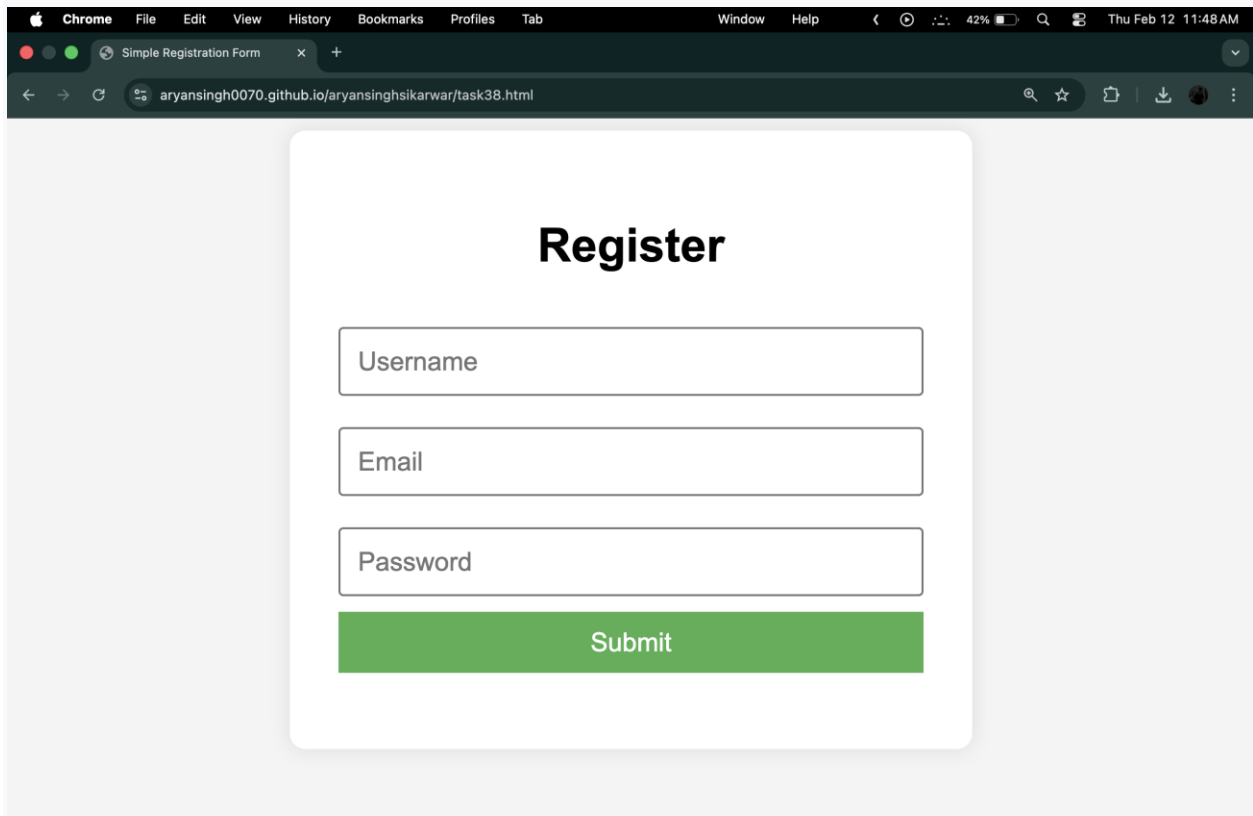

NAME:- ARYAN SINGH SIKARWAR

REG NO:- 24BCE0403

TASK:- Create a simple registration form with three input fields: username, email, and password.

When the user clicks the "Submit" button, use JavaScript's `focus()` method to check each field sequentially, if the username is empty, focus on it; otherwise, check the email, and so on for the password. **This improves user experience by directing attention to the first invalid field.**

The screenshot shows a web browser window with the title 'Simple Registration Form'. The address bar displays the URL 'aryansingh0070.github.io/aryansinghsikarwar/task38.html'. The page content features a white registration form with a green shadow. The form has a title 'Register' in bold black text. Below the title are three input fields labeled 'Username', 'Email', and 'Password'. At the bottom of the form is a green 'Submit' button.
