

PROJECTS

Expense Tracker Web
Application

Developed a full-stack application for tracking personal finances using React and Node.js. GitHub: github.com/jacksonmiller/expensetracker

Weather Forecast Dashboard

Created an interactive weather dashboard using JavaScript and API integration to display real-time data. GitHub: github.com/jacksonmiller/weatherdash

KEY ACHIEVEMENTS

-  **Performance Optimization Award**
Revamped core application architecture, reducing load times by 45% and enhancing user retention rates.
-  **Team Collaboration Excellence**
Led a cross-functional team project, achieving a 100% on-time delivery success rate across 5 project milestones.
-  **Innovation in Code**
Contributed to an internal tool's development, reducing manual reporting times by 60% for the finance team.

SUMMARY

Over 8 years of experience as a JavaScript Developer with proven expertise in React.js and Node.js. Excel in collaborating with UX/UI designers and backend developers to deliver scalable web applications. Proudest achievement includes optimizing an app's performance, increasing user engagement by 30%.

EXPERIENCE

JavaScript Developer 01/2026 - Present
CloudWave Solutions Indianapolis, Indiana

- Developed modern web applications using JavaScript, React.js, and Node.js, increasing user-friendly features by 40%.
- Collaborated with UX/UI designers, integrating design concepts into code and boosting user satisfaction scores by 28%.
- Implemented RESTful APIs and optimized application performance, resulting in a 15% reduction in load times.
- Conducted code reviews and maintained coding standards, reducing bugs in production by 25%.
- Mentored junior developers, enhancing team skills and increasing group performance by 20%.

Front-End Engineer 05/2022 - 12/2025
InnovateTech Inc Indianapolis, Indiana

- Developed responsive front-end features using React.js, increasing mobile user engagement by 35%.
- Worked closely with backend developers to ensure seamless integration of front-end components.
- Utilized Webpack to optimize build processes, improving application performance by 20%.
- Enhanced collaboration with cross-functional teams, improving project delivery timelines by 25%.
- Skills in Python, Java, SQL, React, Git, FastAPI, HTML, CSS, and JavaScript.

Software Developer 06/2018 - 04/2022
DataPulse Systems Indianapolis, Indiana

- Engineered complex web applications using JavaScript, increasing software capabilities by 50%.
- Integrated third-party APIs, enhancing the application's functionality by 20%.
- Performed rigorous debugging, reducing system errors and user complaints by 30%.
- Fostered collaborative approaches in problem-solving, enhancing team efficiency by 18%.

EDUCATION

Bachelor of Science in Computer Science 01/2014 - 01/2018
Purdue University West Lafayette, Indiana
