Completed	Sunday, 14 September 2025, 4:09 PM
Duration	5 days 22 hours
Marks	15.00/15.00
Grade	10.00 out of 10.00 (100%)

Question 1

Correct

Mark 5.00 out of 5.00

Flag question

Fill the code of of following link list function.

i) insertion at beginning: **insertAtBeg(ListNode **head, int x)**

ii) insertion at end: **insertAtLast(ListNode **head, int x)**

iii) printing the list : **printList(ListNode *head)**

iv) delete the item from link list at beginning - if link list is empty return -9999

v) delete the item from link list from the last - if link list is empty return -9999

The menu driven main function is already implemented. The menu for main function are as follows:

1 - to insert element at beginning

2 - to insert element at end

3 - to print element of link list separated by a comma and space
